

# SoCal RP 1144 (Low-VOC) Long-Term Water Displacing Rust Preventive

Rev: 4/14

## DESCRIPTION

SoCal RP 1144 (Low-VOC) is a rust preventive and water displacing petroleum base product, designed to displace water and protect ferrous metals against rust in long term outdoor storage applications. The surface remains oily to the touch with a grease like consistency.

## RECOMMENDED USES:

SoCal RP 1144 has been developed as an anti-rust compound for long term outdoor storage. SoCal RP 1144 can be applied by brush or dipping.

## ADVANTAGES

- Heavy duty long term rust prevention
- Coats metal with heavy oily film
- Contains no heavy metals (barium free)
- Displaces water while it lubricates
- Cleans with petroleum solvent
- Remains intact even under sunny & Hot weather conditions

## TYPICAL PROPERTIES

- Color: Dark Brown
- Flash Point °F: 300
- Gravity API @ 60°F: 30.5
- Specific Gravity @ 60°F: 0.87
- Density: 7.27 Lbs/Gal

\* The above typical properties are subject to manufacturing tolerances.

## PACKAGING OPTIONS (USA)

- 5 Gallon Pail
- 55 Gallon Drum
- 275 Gallon Tote

## PACKAGING OPTIONS (Outside the USA)

- 20 Liter Pail
- 208 Liter Drum
- 1,000 Liter Tote
