

## COSMOLINE RUST-INHIBITING WAX WRAP #714 (wax-impregnated, tacky, self-adhering)

**Cosmoline Wax Wrap 714** is a non-toxic, long-term, rust-inhibiting protective wrap that effectively prevents rust and corrosion on all types of metal while in transit or storage. Because **Cosmoline Wax Wrap 714** contains no VOC's or harsh chemicals in its manufacturing, it can be safely applied to any metal without harm to the user or its surrounding environment.

**Cosmoline Wax Wrap 714** is a non-woven polypropylene that is generously impregnated with a highly-formulated tacky, industrial-grade Cosmoline wax on BOTH SIDES of the wrap. These two components come together to form a hydrophobic, flexible and self-adhering protective wrap which is safe to use on all metal surfaces. **Cosmoline Wax Wrap 714** remains effective even in the harshest of environments including heavy salt-laden/spray atmospheres, high humidity and extreme temperature ranges.

### **BENEFITS & CHARACTERISTICS:**

- Provides reliable long-term protection from rust & corrosion for years!
- Extremely easy to apply and remove....just wrap and unwrap!
- No Prep or Set Up Needed.
- Abrasion & Bacteria Resistant.
- Non-Toxic, Environmentally-friendly, "Green" and Safe to Use.
- Easily conforms to your parts, equipment, etc.
- Can be cut with scissors (if desired) to better accommodate your part or surface.
- Effective in all Atmospheres
